

CALL FOR ACTIVIST

FOR THE INTERNATIONAL WORKING GROUP FOR DEGROWTH ACTIVISTS AND PRACTITIONERS

The aim of this group is to support degrowth activists/practitioners around the world and to promote international campaigns and collective actions. It was founded at the degrowth pre-conference in Freetown Christiania 2018 where different degrowth realities met in order to further organize the Degrowth movement.

The roles of this working group are the following:

- 1) Support the organization of (decentralized) international degrowth campaigns. Examples for this could be the annual degrowth picnic or online media actions on occasions like Black Friday or Overshoot day.
- 2) Support the organization of collective and centralized actions where activists from the many different degrowth realities can come together physically. For example a degrowth demonstration for the next COP on climate change, a protest action against a big infrastructure project, etc.
- 3) Support of activists and practitioner groups, in particular newcomers, by being a reference (per call and email) for people interested to engage with degrowth. It can provide contacts (other groups, experts on certain topics, etc.), materials (literature, graphics, IT tools, etc.), and suggestions to support their ideas and actions.

Please if you are interested to form part of this new working group, please contact us!
